three years. I really like their FREEDOM Suite Desktop and FREEDOM Suite Server. Their FREEDOM Suite is the best choice. They have made it much easier than any other company and you can get their full version of FREEDOM Suite for a very good price. The number one thing that makes FREEDOM Suite so unique is that they have won the "Best Database Program" for many years. FREEDOM Suite is just a great program and well worth the money. They have not failed me yet and if you have not tried FREEDOM Suite, you really should." - CC: The Owner of this review Ask a question about this product.

What's New in the Drive Backup Server Edition?

Drive Backup Server (DBRS) is the most sophisticated and advanced Windows backup and recovery solution available for Windows Servers. DBRS runs from a native Windows Server Core (R2) Hyper-V image and can support restore and backup operations for up to 4 NTFS volumes (without Windows Server Hyper-V). One of the DBRS strengths lies in the ability to simulate, manipulate, and recover a complete server disk using a series of lightweight snapshots. DBRS gives you the ability to store these snapshots (referred to as Image copies) to a local storage device or even to a remote server. You can save time and eliminate the potential for data loss by restoring a DBRS image to any Windows Server without losing any of your data, applications, or settings. DBRS also includes several backup and restore functions including file, folders, and complete disk level restore. DBRS can be customized with your own backup scripts, and also includes a complete support interface with the ability to view and control multiple servers. Company: Drive Backup Server (DBRS) has been developed by the experts at Data Rescue who have years of experience in large-scale Windows disaster recovery systems. Version: DBRS was released as an entirely new product, however, the robust recovery capabilities are based on a backup technology from Data Rescue. File Size: 34.82 MB Installation File: DBRS setup package in Zip Format Special Thanks: Data Rescue for source code, source code documentation, technical support, the source code logo and the technical support logo on the download page.
